ABOUT ME

Recent graduate in Software Engineering from Ho Chi Minh City University of Foreign Languages - Information Technology (HUFLIT). A quick learner with strong problem-solving skills, capable of effectively handling technical challenges in real-world environments. Aspiring to become a Fullstack Engineer within the next 3 years.

WORK EXPERIENCE

• FREELANCE DEVELOPER

Grade 10 Enrollment Registration System | Team of: 2 | Fullstack Developer **June 2026 - August 2026**

- **Tech stack:** PHP 8.1, MySQL, HTML/CSS, JavaScript
- Developed a full-stack Grade 10 Enrollment Registration System for THPT Ham Thuan Nam, handling 600+ students with dynamic subject-combination logic, real-time status tracking, an asynchronous email queue for automated confirmations, and an admin dashboard featuring Chart.js analytics and Excel import/export via PhpSpreadsheet.
- Implemented security measures including BCrypt hashing, CSRF protection, brute-force rate limiting, and SQL injection prevention via prepared statements.

SUNILIES | Team of: 2 | Fullstack Developer

February 2026 - June 2026

- **Tech stack:** Spring Boot, Thymeleaf, Firebase, MoMo Payment Gateway.
- Architected and developed an e-commerce supporting product management, order processing, and user authentication.
- Integrated MoMo Payment Gateway with HMAC-SHA256 signature verification and asynchronous IPN webhook handling for real-time payment confirmation.
- Implemented advanced security measures including BCrypt hashing, session fixation prevention, brute-force rate limiting, and XSS sanitization.
- Integrated Firebase Storage, Stringee Voice OTP, and JavaMail for file management, phone verification, and email notifications.

• LEAD MANAGEMENT SOLUTIONS COMPANY

Fullstack Mobile Development Intern | Team of: 6

August 2025 - November 2025

- **Tech stack:** Flutter, Node.js, Firebase
- Sample Management System: As an individual contributor within a 6-person team, independently owned end-to-end development of a mobile solution to digitize laboratory workflows—from sample tracking to automated reporting - implementing a structured database schema to manage 10+ critical field parameters.
- Implemented role-based access control to segregate permissions across departments, and enabled real-time data synchronization with change-log auditing to ensure data traceability and accountability.

EDUCATION

University of Foreign Languages - Information Technology Ho Chi Minh City (HUFLIT)

- Bachelor of Software Engineering | **GPA:** 3.03

2022 - 2026

SKILLS

- **Programming Languages:** Dart, Java, JavaScript.
- **Frontend Development:** Flutter, React.js.
- **Backend Development:** Node.js, Express.js, ASP.NET Core, RESTful API.
- **Databases:** SQL Server, MySQL, MongoDB, Firebase.
- **IDE:** Visual Studio Code, Visual Studio, Android Studio.
- **Tools:** Git/Github, Figma, Jira, Postman.
